Multimedia Instructions for Authors

AMD *u*ses multimedia to engage, communicate, and illustrate experiences that text cannot accomplish. As an online publication **AMD** goes beyond what traditional print journals can do. We are interested in evidence for your research claims, as well as experiences that provide new or better ways of knowing.

Examples of multimedia enhancements can include:

➢ special videos
➢ data excerpts
➢ graphs
➢ dynamic models
➢ simulations

Developing media enhancements is not about making pretty pictures. It's about doing better social science.

Media files can be uploaded as part of your original submission.

To upload multimedia files:

1) Go to https://mc.manuscriptcentral.com/amd
2) From "File Upload" designate the file type as supplementary file for review
   * Make sure all author-identifying references have been removed
   * Some author supplied multimedia *may* require hosting outside of the *AMD* platform
3) Your multimedia should only use the following file types:
   ➢ **VIDEO:** .WMV or .MP4
   ➢ **AUDIO:** .MP3 only
